

How to make a QR Code using Chrome

1. Go to the website you want to make a QR code for
2. Right click anywhere in the body of the website page
3. In the dropdown menu, click "Create QR Code"
4. Select "Download" and give it a new name if you want to\
5. You can open the download and do a "Save as" to another directory on your computer

OR

Paste on the document you want it to be on

Double check it works by scanning with your phone.
